IT CONSULTANT
ELECTED FELLOW

More than 20 years after he founded an IT consultancy in Exeter, Alastair Revell has been elected a fellow of the Institution of Analysts and Programmers.
Mr Revell has been developing software for businesses across the UK since setting up Revell Research Systems in 1985.

Based in Coates Road, the practice also develops websites, provides technical support and offers network engineering expertise.

Britain's leading professional organisation for those working in business systems and computer software, the institution appoints fellows who are deemed "outstanding professionals who have spent a considerable part of their working life in positions of substantial responsibility".

Reacting to his election, Mr Revell said: "I'm very used to upgrading information systems, but not so used to being upgraded myself."

Revell Research Systems recently launched a new website, www.rrs.co.uk, as part of its 21st year in business.
