## PRESS RELEASE

FOR IMMEDIATE RELEASE

### EXETER IT CONSULTANT IS A JOLLY GOOD FELLOW

Alastair Revell, the managing consultant of Exeter-based Revell Research Systems, has recently been elected a fellow of The Institution of Analysts and Programmers, Britain's leading professional organisation for those working in the development, installation and testing of business systems and computer software. Admission to the Institution's most senior grade is at the discretion of the body's ruling council.

According to The Institution, Fellows are "outstanding professionals who exceed the requirements for Member by a substantial margin, and who have spent a considerable part of their working life in positions of substantial responsibility".

Alastair Revell has been developing software for businesses across the United Kingdom since starting Revell Research Systems in Exeter in 1985. The consultancy practice, which recently launched a new web site at [www.rrs.co.uk](http://www.rrs.co.uk) as part of its twenty-first year in business, also develops web sites, provides technical support and strategy advice, as well as offering expertise in network engineering.

Speaking on his recent election, Alastair Revell joked: "I'm very used to upgrading information systems, but not so used to being upgraded myself!"
